## tlog TAG

(-10 to +70°C)

### Most Economical; Accurate & Intelligent Temperature Logger

#### SPECIFICATIONS

Temperature Range	: - 10 to +70°C
Sensor Location	: Internally mounted
Response Time	: 10 min to 90% typ. (in air)
Temperature Accuracy	: + 0.5°C
Memory Size	: 8K
Logging Capacity	: 8,000 readings
Logging Interval	: 5 seconds to 18 hours
Start Options	: Immediate / Delay Start
Stop Options	: When memory is full or via TLog software
Delayed Start	: 0 seconds to 10 days
Programming Options	: Pre-Programmed with "Cut Tab to Start" & "Cut Tab to Stop" options or User-Programmable with "Immediate / Delay Start" options
LED Indications	: Green Led flickering during logging
Battery Type	: 3.0 V
Accuracy Test Certificate	: Yes
Calibration	: 3 Points NIST Traceable Calibration Checks (optional)
PC Interface	: USB
Software	: User Friendly TLog Software Version 2.1
Downloaded Data Files Save Format	: .inn with PDF save option
Warranty	: 1 year
Casing	: IP 54 Splash-proof; Tamper-proof & Robust
Case Material	: Polycarbonate / ABS
Case Dimensions	: Length: 58mm; Height: 38mm; Width: 0.9mm
Weight	: 28g

#### Unique Features of TLog Software

- ▶ Graphical view of recorded readings
- ▶ Table of readings view of recorded readings
- ▶ Statistical view with time selection tool
- ▶ Maximum recorded temperature value
- ▶ Minimum recorded temperature value
- ▶ Displays battery condition / voltage
- ▶ Average recorded temperature value
- ▶ Mean kinetic temperature value
- ▶ Overlay of Graphical view
- ▶ Time spent over specified temperature limit
- ▶ Time spent below specified temperature limit
- ▶ Displays current temperature reading
